Drive Hider Crack+ Free Download (Final 2022)

Hide local drives, removable devices, or floppy disks on your Windows computer with Drive Hider Crack For Windows! Drive Hider is an easy to use, compact application designed with a single goal in mind: to help you hide local drives, removable devices, or floppy disks. Compared to other utilities that come packed with different encryption

algorithms for protecting sensitive data from unauthorized viewing, this tool offers a simple software solution for concealing the important information from your computer.

Drive Hider sports a clean and straightforward layout that gives you the possibility to set up the dedicated parameters with minimum effort. The tool lets you select the drive letters to be hidden manually or you can select them all with just one click. A computer restart is absolutely mandatory for the changes to be applied correctly. It is important to mention that hotkeys are also available for a better control over the entire process, but they cannot be reassigned.

What's more, the program features a password protection system, so you can make sure other users cannot modify, disable, or uninstall the utility. Other important features worth mentioning are represented by the possibility to export the configuration settings to REG file format

and upload them whenever you need to apply them on the go. Since it doesn't require much computer knowledge to work with this tool, even rookies can master the entire process without having to consult a help manual. During our testing we have noticed that Drive Hider carries out a task very quickly and without errors throughout the entire process. As it would be expected from such a small utility, it leaves a minimal footprint on system resources, so the overall performance of the computer is not hampered. Directory Opus is a file system program that enables users to create and modify encrypted directories, then replace the contents of the directory with a key file. Directory Opus comes complete with a comprehensive help file, an article on the website and a PDF installation manual. Directory Opus is available in English. CDice is an application that creates digital images of hard disks and CDs. It provides the ability to add text to

your images, and create CD/DVD image files. You can also compress these image files into one file. CDice's main target is professional users. If you don't want to go into the details of creating such images, you can use our freeware that creates and displays these images. FSColorizer is a graphical front-end to the "gfxcolorizer.exe" command-line utility. It lets you easily create digital images of your hard disks or CDs. The
